ABOUT CfPIE

Learn from the Leader

In a life sciences industry that has faced nearly $15 billion in fines and compliance-related settlements over the last several years, The Center for Professional Innovation & Education (CfPIE) is a better alternative for maintaining high standards, protecting industry reputations, and enhancing personal growth. Since 2001, we have embraced a singular goal—to provide the highest quality education to life science professionals. Today, as the global leader in quality life sciences training, we offer the largest range of course options for professional development in pharmaceutical, medical device, biotech, and skin/cosmetics disciplines. We are dedicated to enriching that reputation by conveying content relevant to the needs of individuals and organizations facing intense scrutiny in those highly technical disciplines.

PAYMENT

$2150.00 PER PERSON (INCLUDES BREAKFAST & LUNCH). El Paso Course is $1550 and is offered in partnership with MCA/Bio El Paso/Juarez.

EARLY BIRD DISCOUNT

If you register at least thirty days in advance you will receive a $200 discount on the course. *Not applicable to El Paso dates. Contact us at 610-648-7550 or info@cfpie.com for information regarding partnership discounts or how your organization can become a partner with CfPIE.

CANCELLATION POLICY

All cancellations must be in writing and are subject to a $350.00 cancellation fee. If cancellations are made more than 30 days prior to the course, a refund less the cancellation fee will be provided. If cancellations are made less than 30 days prior to the course, a voucher good for attendance at an upcoming course will be provided. The voucher, which can be used by the registrant or anyone else within his/her company, will be valued at the registration fee minus the $350.00 cancellation fee.

If a registered attendee does not cancel and fails to attend, neither a refund nor voucher will be issued. All course cancellations must be in writing and emailed sent to info@cfpie.com. Registrants are responsible for contacting the hotel and canceling their room reservations.

CfPIE reserves the right to alter the venue, if necessary.

Substitution Policy - Classroom Courses

Substitutions are accepted at no penalty with written notification from the original registrant in advance of course. All substitution requests must be in writing and emailed to info@cfpie.com.

CfPIE also offers on-site courses for 10 or more attendees. Contact us at info@cfpie.com.

PROJECT MANAGEMENT FOR MEDICAL DEVICE PRODUCT DEVELOPMENT

COURSE DIRECTOR: MALLY ARAD

February 20 & 21, 2019 - Malvern, PA

COURSE DESCRIPTION

Efficient and effective project management of medical device product development projects can significantly impact the project scope, timelines and budget for the development of a product. Project managers must understand the development process and the key aspects of the stage gate phases and design control requirements in order to be able to plan and execute effectively. Successful completion of the product requirements gathering, product design, verification and validation are key project milestones and this course focuses on the best practices for managing these projects from developing the Charter to conducting Lessons Learned. The course is interactive and designed to allow for the exchange of ideas between peers in addition to learning from the instructor.

WHO SHOULD ATTEND

This two-day course is an overview designed for those who will manage or direct cross functional medical device product development projects within the Research and Development organization. The course is particularly beneficial to those about to become or who are recently appointed projects managers. The course is also appropriate for more experienced project managers new to the medical device industry. It will benefit those who need an understanding of the medical device product development process incorporating project management best practices and Design Control principles that should apply to their project.
LEARNING OBJECTIVES

The learning objective is to provide knowledge of the project management practices, skills and tools that are necessary to initiate, plan, execute, control, monitor and close-out a medical device development project. Understanding the product development and project management processes, practices and compliance requirements increase the project manager effectiveness and probability to meet project goals.

By the end of the course, participants should be able to do the following:

- Understand the overall medical device product development Stage Gate process and be familiar with common terminology
- Initiate, plan, execute, monitor and control a medical device product development project
- Apply project management best practices to medical device product development projects
- Manage a cross functional project team
- Recognize roles and responsibilities of cross functional team members
- Understand design control requirements and the components of the DHF
- Understand and manage the challenges of a medical device project

INSTRUCTOR CREDENTIALS

Mally Arad, PMP, is the Managing Director of Global Project Partners, LLC, a consulting company providing project management consulting services to medical device and pharmaceutical companies. Ms. Arad has 17 years of experience in the life-sciences industry in the areas of product development and commercialization, quality assurance, process improvements and regulatory projects. She has helped both small and large companies to improve their product development process and meet their project objectives by implementing a discipline project management approach to their process and their organizational management structure.

Mrs. Arad holds a Bachelor of Science – Business Administration degree from the University of California at Berkeley and an MBA California State University, Hayward. She is a certified Project Management Professional (PMP) with the Project Management Institute.
