ADME, PK/TK, AND DRUG METABOLISM IN DRUG DISCOVERY AND DEVELOPMENT

The content of this overview course will assist pharmaceutical, biotechnology, and CRO researchers and managers in understanding the requirements for a well-designed and successful ADME, PK/TK, and DM program conducted within a drug development logic plan and in compliance with ICH guidelines. The various types of ADME, PK/TK, and DM studies, which include in vitro metabolism and delivery, animal and human pharmacokinetics, protein binding, mass balance, tissue distribution, metabolite isolation and identification, and toxicokinetic support, will be discussed.

Study designs and potential results along with possible interpretations from each of the study types will be presented. The generation study reports and summaries, both of which are to be included in submissions to regulatory authorities for completed research experiments, will also be discussed.

ABOUT CfPIE

Learn from the Leader

In a life sciences industry that has faced nearly $15 billion in fines and compliance-related settlements over the last several years, The Center for Professional Innovation & Education (CfPIE) is a better alternative for maintaining high standards, protecting industry reputations, and enhancing personal growth. Since 2001, we have embraced a singular goal—to provide the highest quality education to life science professionals. Today, as the global leader in quality life sciences training, we offer the largest range of course options for professional development in pharmaceutical, medical device, biotech, and skin/cosmetics disciplines. We are dedicated to enriching that reputation by conveying content relevant to the needs of individuals and organizations facing intense scrutiny in those highly technical disciplines.

HOW TO REGISTER

1. Go to http://www.cfpie.com
2. Go to “REGISTER HERE” and select your course.
3. Create an account and register for your course.

INSTRUCTOR: DUANE B. LANKINGS, PH.D.

January 30 – Feb. 1, 2019 - Los Angeles, CA
April 10 – 12, 2019 - London, UK
June 5 – 7, 2019 - Malvern, PA
Oct 23 – 25, 2019 - Boston, MA

COURSE DESCRIPTION

The content of this overview course will assist pharmaceutical, biotechnology, and CRO researchers and managers in understanding the requirements for a well-designed and successful ADME, PK/TK, and DM program conducted within a drug development logic plan and in compliance with ICH guidelines. The various types of ADME, PK/TK, and DM studies, which include in vitro metabolism and delivery, animal and human pharmacokinetics, protein binding, mass balance, tissue distribution, metabolite isolation and identification, and toxicokinetic support, will be discussed.

CfPIE also offers on-site courses for 10 or more attendees. Contact us at info@cfpie.com.

PAYMENT

$2650.00 PER PERSON (INCLUDES BREAKFAST & LUNCH)

EARLY BIRD DISCOUNT

If you register at least thirty days in advance you will receive a $200 discount on the course.

ADDITIONAL DISCOUNTS

Contact us at 610-648-7550 or info@cfpie.com for information regarding partnership discounts or how your organization can become a partner with CfPIE

CANCELLATION POLICY

All cancellations must be in writing and are subject to a $350.00 cancellation fee. If cancellations are made more than 30 days prior to the course, a refund less the cancellation fee will be provided. If cancellations are made less than 30 days prior to the course, a voucher good for attendance at an upcoming course will be provided. The voucher, which can be used by the registrant or anyone else within his/her company, will be valued at the registration fee minus the $350.00 cancellation fee.

If a registered attendee does not cancel and fails to attend, neither a refund nor voucher will be issued. All course cancellations must be in writing and emailed sent to info@cfpie.com. Registrants are responsible for contacting the hotel and canceling their room reservations.

CfPIE reserves the right to alter the venue, if necessary.

Substitution Policy - Classroom Courses

Substitutions are accepted at no penalty with written notification from the original registrant in advance of course. All substitution requests must be in writing and emailed to info@cfpie.com.

CfPIE also offers on-site courses for 10 or more attendees. Contact us at info@cfpie.com.

INSTRUCTOR CREDENTIALS
Duane B. Lakings, Ph.D., is the Principal and President of Drug Safety Evaluation Consulting, Inc. DSE Consulting assists pharmaceutical and biotechnology companies in designing, conducting, and interpreting results from experiments for characterizing and developing drug candidates into therapeutic products. Dr. Lakings has over 25 years of experience in drug discovery and developability assessment, preclinical and nonclinical development, and clinical development and has designed and conducted animal and human research studies on both small organic molecules and macromolecules.

His primary areas of expertise include pharmacokinetics and toxicokinetics, drug metabolism and ADME, drug delivery, and bioanalytical chemistry and he has excellent knowledge of the pharmacology, toxicology, and clinical requirement for successful drug development. During his career, he has been involved in characterizing drug candidates for a number of therapeutic diseases and disorders, including CNS, cardiovascular, metabolic diseases, oncology, infectious diseases (bacterial and viral), and dermatology. Since opening DSE Consulting, he has used his knowledge to assist clients with defining drug development logic plans, selecting and managing CROs, and preparing study reports for completed nonclinical and clinical research studies.

LEARNING OBJECTIVES
Upon completing this course, participants will have a basic knowledge of the research studies conducted to characterize the likelihood of success for a drug candidate (either a small organic molecule (NCE) or macromolecule) after administration to animal models and humans.

Participants will learn about and understand the requirements for ADME, PK/Tk, and DM studies conducted to select the optimal drug discovery lead (developability assessment), to support first-in-human clinical trials (preclinical studies) and to compare and extrapolate metabolism profiles from animal models to humans (nonclinical and clinical evaluations).

FIRST DAY
Session 1: Introduction and Overview (9:00 – 10:15 AM)
- Purpose and Goals
- Drug Discovery and Development Logic Plan
- Types of Drug Metabolism and ADME Studies

Session 2: Developability Assessment Experiments – Part 1 (10:30 AM to noon)
- Developability Assessment Overview
- In Vitro Delivery and Example Profiles
- Preliminary Protein Binding
- In Vitro Metabolism

Session 3: Developability Assessment Experiments – Part 2 (1:00 PM to 2:30 PM)
- Bioanalytical Chemistry Method Definition
- Preliminary Pharmacokinetics and Example Profiles
- Bioavailability and Example Profiles
- GLP Regulations

Session 4: Preclinical Drug Development Experiments – Part 1 (3:00 PM to 4:30 PM)
- Bioanalytical Chemistry Method Validation
- Pharmacokinetic Parameter Definitions
- Pharmacokinetic Assessments in Toxicology and Pharmacology Animal Species
- Absolute Bioavailability and Dose Proportionality Examples

SECOND DAY
Session 5: Preclinical Drug Development Experiments – Part 2 (9:00 AM to 10:15 AM)
- Toxicokinetics
- Multiple Dose Evaluation Examples
- Gender Effect Examples
- Drug Candidate Radios isotopic Labeling
- Choice of Label and Labeling Site
- Radiochemical and Metabolic Stability Evaluations
- Mass Balance in Toxicology Species
- Metabolic Profiling Assay
- Study Design and Sampling Recommendations
- Extent of Metabolism
- Route(s) and Rate(s) of Elimination
- Definitive Protein Binding in Various Species

Session 6: Clinical Drug Development Experiments (10:30 AM to noon)
- Types of Human ADME and Drug Metabolism Experiments
- Human Pharmacokinetic Evaluation Examples

Session 7: Clinical Drug Development Experiments (1:00 PM to 2:30 PM)
- Drug-Drug and Drug-Food Interactions
- Stereochemistry Issues
- Bioavailability and Bioequivalence Evaluations
- Renal and Hepatic Impairment Studies
- Age Effects

Session 8: Nonclinical Drug Development Experiments – Part 1 (3:00 PM to 4:30 PM)
- Toxicokinetic Support
- Feto-placenta Transfer and Lacteal Secretion Toxicokinetic Studies
- Tissue Distribution (Single– and Repeat–Dose) and Whole Body Audiograms
- Studies Design and Sampling Requirements

THIRD DAY
Session 9: Nonclinical Drug Development Experiments – Part 2 (9:00 AM to 10:15 AM)
- Metabolite Isolation and Identification
- Development and Validation of Bioanalytical Method(s) for Metabolites
- Pharmacokinetic Evaluation of Metabolites
- Definition of Metabolism Pathway
- Induction and Inhibition of Drug Metabolizing Enzymes
- Animal Bridging Studies

Session 10: Documentation (10:30 AM to noon)
- Study Protocols
- Technical/Study Reports
- Test Assay Methods
- Standard Operating Procedures
- Summaries for Submission to Regulatory Authorities

Session 11: Workshop (1:00 PM to 3:00 PM)
- Summary and Conclusions
- Workshop to Design and Discuss ADME and Drug Metabolism Studies Needed to Support the Discovery and Development of Various Drug Candidate Types

HOTEL INFORMATION
The Hilton LAX, Los Angeles, CA (CfPIE room rate of $167/night if booked 3 weeks in advance of the course date)
The Desmond Hotel & Conference Center, Malvern, PA (CfPIE room rate of $141/night if booked 3 weeks in advance)
Club Quarters Hotels, Boston, MA (CfPIE room rate of $255/night if booked 4 weeks in advance)
DoubleTree by Hilton London - Victoria (CfPIE room rate of £199.00/night if booked 4 weeks in advance)
